

HYDRAULIC HOSE PIPE

Hydraulic Hose Pipes are high-pressure flexible hoses used to transfer hydraulic fluid between pumps, valves, cylinders, and other hydraulic components.

Features

- High-pressure resistance
- Flexible and durable construction
- Oil, abrasion, and weather resistant
- Steel wire braided or spiral reinforced
- Long service life

Common Types

SAE 100 R1AT, SAE 100 R2AT, SAE 100 R12, SAE 100 R13, SAE 100 R15 and Thermoplastic Hydraulic Hoses.

Applications

Hydraulic Power Packs, Excavators, Loaders, Injection Molding Machines, Press Machines, Agricultural Machinery and Industrial Hydraulic Systems.

Available Sizes

1/4", 3/8", 1/2", 5/8", 3/4", 1", 1¼", 1½", 2"
